PROFESSIONAL SUMMARY

BCA final-semester student and MERN Stack Developer with hands-on experience building modern, responsive web applications. Skilled in React.js, JavaScript, REST API integration, reusable components, and responsive UI development. Seeking a fresher, internship, or junior developer opportunity to contribute to real-world web projects and grow as a full-stack developer.

PROJECTS

Task Manager App

Frontend + Backend · Personal Project · [Live Demo](#) ↗

- Developed a comprehensive task management application allowing real-time creation, updates, deletion, and status transitions of user tasks.
- Implemented React hooks (useState, useEffect, useMemo) for state persistence, conditional rendering, and performance optimization.
- Designed an interactive user interface featuring drag-and-drop mechanics, priority filtering, and smooth transitions powered by Framer Motion.
- Integrated RESTful APIs with error-handling mechanisms for loading states, empty lists, and network disruptions.

React.js

Node.js

MongoDB

Framer Motion

Print Point – Business Website

Frontend Developer · Client Project · [Live Demo](#) ↗

- Engineered a high-performance business website for a commercial printing service using React.js, Tailwind CSS, and Vite.
- Designed reusable UI sections, interactive service catalogs, and animated components to enhance customer navigation.
- Built with a mobile-first responsive design philosophy, ensuring cross-browser compatibility and optimized loading speeds.
- Implemented clean code principles and smooth scroll animations for a polished, modern client presentation.
